R4 Blind Test — 5-second AI-reply identification

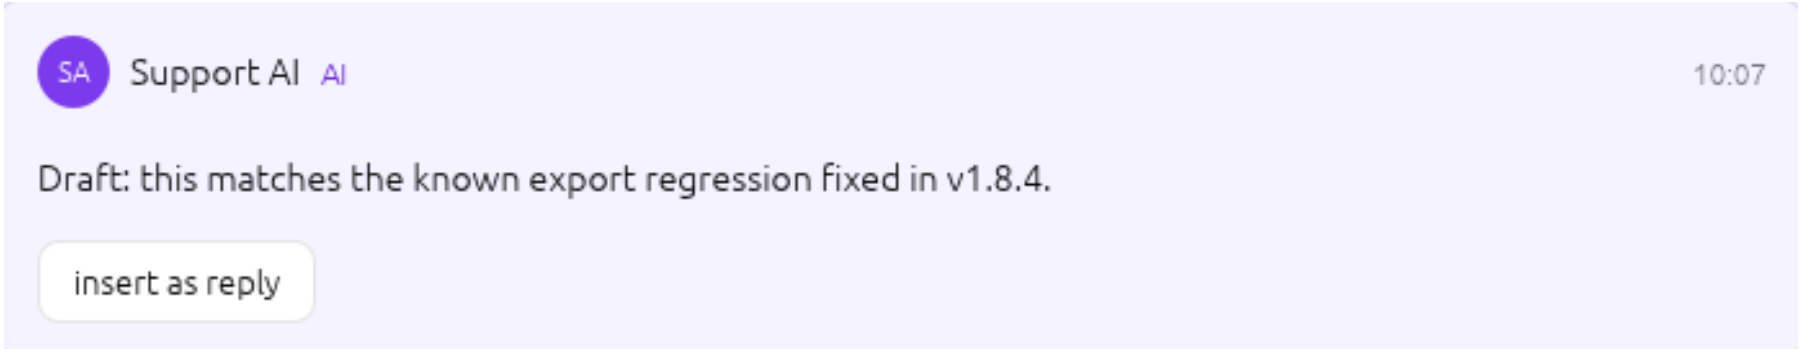

Protocol: docs/audit/acceptance/blind-test-protocol.md (DC basis DS-C-22, Gate G4).

1. Show each of the following ten cards for exactly 5 seconds (a phone timer or metronome works), then ask once: “Was this written by AI?” — yes/no, no revision, no discussion.
2. Record the answers on g4-answer-sheet.pdf (row numbers match the slide page numbers).
3. Pass bar: ≥ 9/10 correct overall AND zero false-AI calls on the five non-AI cards.
4. The cards were cropped from the checked-in kittest goldens (real app renders). No page context appears — the answer must come from the card alone.

Presenter: advance one page per card. The truth key is printed AFTER the end marker — do not show pages past the end marker to the participant.

The export button does nothing on the dashboard — I click Export and nothing happens.

END OF STIMULI — stop here.

Everything after this page is the administrator key.

ADMINISTRATOR KEY — not for the participant

Presentation order (seeded shuffle, deterministic):

card 1 -> AI source: r3_diagnostics_page_1440_dark.png crop (14, 672, 668, 706)
card 2 -> AI source: r2c_inbox_identity_dark.png crop (12, 432, 708, 566)
card 3 -> AI source: r2c_inbox_identity_light.png crop (12, 432, 708, 566)
card 4 -> not AI source: r2c_inbox_identity_light.png crop (12, 318, 708, 414)
card 5 -> not AI source: r3_customers_detail_light.png crop (243, 142, 442, 398)
card 6 -> AI source: r2c_inbox_identity_light.png crop (12, 616, 708, 812)
card 7 -> not AI source: r2c_inbox_identity_dark.png crop (12, 200, 708, 300)
card 8 -> AI source: r2c_inbox_identity_dark.png crop (12, 616, 708, 812)
card 9 -> not AI source: r3_inbox_page_1440_light.png crop (533, 347, 1410, 455)
card 10 -> not AI source: r3_inbox_page_1024_light.png crop (543, 228, 995, 345)

Scoring: 1 point per correct call; pass = >= 9/10 AND zero false-AI (an 'AI' answer on a non-AI card).
